Speed and Efficiency

Speed and efficiency at the retail checkout is essential to providing effective customer service.

SpacePole® enables the most productive layout of technology at the case point to provide the maximum amount of space for processing customer transactions.

Tailored to Requirement

With a vast number of options and combination possibilities, SpacePole® can be precisely tailored to integrate a lot of technology peripherals into a retail checkout, including touch screens, printers, keyboards, customer facing displays and pin pads.

Key Features

SpacePole® can provide the following features at a checkout installation:

- Stable and secure technology
- Maximises space
- Ergonomically adjustable technology (for both operator and customer)
- Full cable management
- Upgradability for technology refreshes
