

Payment Mounts

Flexible mounting systems at the point of sale

For more information ...

www.spacepole.com

Pin Pad terminals need to be mounted in such a way that they are accessible to as much of the target population as possible. The following functions should be taken into account when mounting your Pin Pad.

Key Features

- **Adjustable:** the angle of display and keypad entry surface
- **Detachable:** particularly for disabled customers
- **Rotation:** easy reach for clients and staff
- **Security:** shielding pin number entry and theft

All of the mounts in our range comply with the functions above, enabling you to mount your Pin Pad in almost any position.

For every terminal we provide a standard range of mounts. Custom options are also available upon request.

Partnerships

Ergonomic Solutions has a close working relationship with all the major terminal providers such as Banksys, ELME, Gemalto, Hypercom, ICP, Ingenico, REA, Sagem, Thales, Thyron and Verifone.
